TELEPHONE NUMBER WHERE YOU CAN BE REACHED TODAY _____

To minimize the risk of anesthesia and surgery, pre-anesthetic bloodwork and ECG is strongly recommended prior to all anesthetic procedures. In animals less than 6 years old, with no existing medical problems, the minimum recommended bloodwork is a 6-Panel Blood Chemistry and Complete Blood Count. The cost of this test is \$81.95. In animals 6 years or older, or those with medical problems, the recommended workup is a 12-Panel Blood Chemistry Profile with a Complete Blood Count. The cost of this test is \$144.50.

I accept the recommended pre-anesthetic bloodwork _____

I decline the recommended pre-anesthetic bloodwork _____

A pre-anesthetic ECG to test heart function and heart rhythm is strongly recommended prior to surgery. The cost of this test is \$81.95.

I accept the recommended pre-anesthetic ECG _____

I decline the recommended pre-anesthetic ECG _____

An intravenous catheter allows direct venous access for medications and fluids. If complications arise during anesthesia or surgery this allows us to quickly administer treatments if warranted. A small area of hair on the front leg will need to be clipped for placement of the catheter. The cost of this procedure is \$58.95.

I accept an IV catheter placed in my pet before surgery _____

I decline an IV catheter placed in my pet before surgery _____
